

Executive Management Scorecards for Environment, Energy and Transportation

The President's Management Agenda

- Announced in the summer of 2001, is an aggressive strategy for improving the management of the Federal government.
- It focuses on five areas of management weakness across the government where improvements and the most progress can be made.

Five government-wide goals

- Strategic Management of Human Capital
- Competitive Sourcing
- Improved Financial Performance
- Expanded Electronic Government
- Budget and Performance Integration

Agency-specific Goals

- In addition to the five government-wide initiatives, there are nine agency-specific reforms:
 - Faith-based and Community Initiatives,
 - Privatization of Military Housing,
 - Better Research and Development Investment Criteria,
 - Elimination of Fraud and Error in Student Aid Programs and Deficiencies in Financial Management,
 - Housing and Urban Development Management and Performance,
 - Broadened Health Insurance Coverage through State Initiatives,
 - A "Right-Sized" Overseas Presence,
 - Reform of Food Aid Programs,
 - Coordination of Veteran's Affairs and Defense Programs and Systems.

The Executive Branch Management Scorecard

Tracks how well the Departments and major Agencies are executing the five government-wide management initiatives.

The Stoplight Scoring System

- The scorecard employs a simple grading system common today in well-run businesses:

Green for success,

Yellow for mixed results, and

Red for unsatisfactory

Who is responsible for implementing the President's Management Agenda?

- In July 2001, the President directed Cabinet Secretaries and Agency heads to designate a “Chief Operating Officer” to have responsibility for day-to-day operations of Departments and Agencies.
- Typically, the department’s No. 2 official, its “Chief Operating officer”, has agency-wide authority and reports directly to the agency Head.
- The assignment places "management" with Presidential appointed officials, primarily at the Deputy Secretary level, where policy and management meet.

President's Management Council

- The President's Management Council (PMC) consists of all the Chief Operating Officers (COOs).
- The PMC provides an integrating mechanism for policy implementation within agencies and across government.
- Importantly, the PMC is a way for the Departments and Agencies to support the President's government-wide priorities and to build a community of management leadership that learns, solves problems, and innovates together.

Executive Management Scorecards

- On January 25, OMB introduced the new draft Executive Management Scorecards for Environment, Energy and Transportation.
- The new scorecard structure resembles the structure of scorecards that OMB uses to assess agency performance in implementing the President's Management Agenda.

Environmental Management Scorecard

- Includes five Key Areas
 - Environmental Management Systems
 - Requirements for acquisition mandatory & non-mandatory green products
 - Sustainability program for green buildings
 - Sustainable environmental stewardship of Federal Electronic Assets
 - Compliance Management Plan

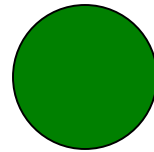

Environmental Management Scorecard

- Sustainable environmental stewardship of Federal Electronic Assets
 - Agency promotes sustainable environmental stewardship of Federal Electronic Assets & meets all green components of the Federal Electronics Challenge on **(date)**
Has met objectives of the Electronics Stewardship MOU **(date)**

STANDARDS FOR SUCCESS

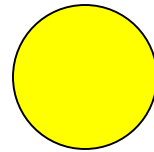

Agency has instituted a sustainability program for electronic stewardship which promotes the purchase, use and end of life management strategies for electronic assets.

STANDARDS FOR SUCCESS

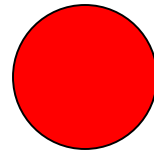

Agency has signed the MOU on Electronic Stewardship and/or is meeting the objectives of the MOU

STANDARDS FOR SUCCESS

Agency did not sign MOU on Electronic Stewardship and does not have a program to promote sustainable environmental stewardship of Federal electronic assets.
